Name _____ **Dystopian Writing Prompts**

Pills for Every Problem

In a future society, there's a pill for every emotion, problem, or challenge one might face. Feeling sad? Take a pill. Need to focus? There's a pill for that too. As this becomes the norm, some start to wonder if relying on these pharmaceutical solutions is truly the answer. Write a story or essay about a character who begins to question the widespread use of these pills, exploring both the comforts and the dangers of a society so dependent on pharmaceutical control.
