The Chronicle

A chronicle is a factual written account of important or historical events in the order that they occurred, without analysis or interpretation. The word chronicle is derived from the Greek word *kronos*, which means time.

There are two categories of chronicles:

- A **dead chronicle** recounts events from the past. It does not include any events that take place after the point in time that the chronicler began writing.
- A **live chronicle** recounts events continuously as they occur.
