

Claim vs. Evidence

DIRECTIONS: Match each piece of evidence to the claim it supports. Write the evidence in the box beside the claim.

CLAIM	EVIDENCE
While generally a healthy food, peanuts are not good for everyone.	
Global warming is real.	
Using animals to test products intended for humans on is morally wrong.	
Canola oil is not as healthy as you probably think.	

There is more CO² in the atmosphere today than there has been in the last 800,000 years.

Most canola oil is genetically modified.

Animals experience the same emotions that we do.

Some people are extremely allergic to peanuts.
