

Logic vs. Truth

Deductive reasoning means making an inference based on information that is well known and widely accepted. When you deduce something, you reason from one (or more) statements to arrive at a logical conclusion. In deductive reasoning, if the premises (statements you are reasoning from) are true, then the conclusion must also be true.

DIRECTIONS: Watch the film clip. Identify the deductive reasoning used in the clip. Write it below.

Have the villagers reasoned correctly? Why or why not?
