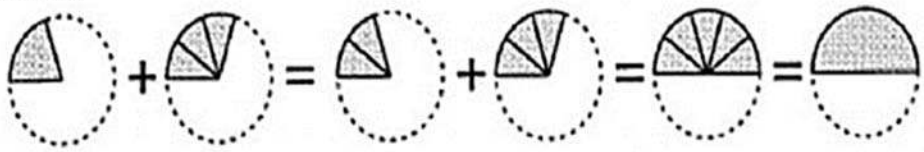
NAME: _____

ADDING FRACTIONS

Use the circles to find the sums. Reduce it to the smallest fraction.



$\frac{1}{5} + \frac{3}{10} = \frac{2}{10} + \frac{3}{10} = \frac{5}{10} = \frac{1}{2}$

$\frac{1}{4} + \frac{3}{12} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ ⊙ = $\frac{\square}{\square}$ ⊙

$\frac{1}{10} + \frac{2}{5} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ ⊙ = $\frac{\square}{\square}$ ⊙

$\frac{2}{3} + \frac{2}{12} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ ⊙ = $\frac{\square}{\square}$ ⊙

$\frac{1}{2} + \frac{1}{6} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ ⊙ = $\frac{\square}{\square}$ ⊙

$\frac{1}{12} + \frac{2}{3} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ ⊙ = $\frac{\square}{\square}$ ⊙

$\frac{1}{6} + \frac{1}{3} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ ⊙ = $\frac{\square}{\square}$ ⊙

HOW DID YOU DO? ☺ 😐 ☹
