

# Vivid Sensory Language

Vivid sensory language is language that allows the reader to experience a text through their senses. There are five types of sensory imagery. Read about each type, then write a sentence about the object in the box that uses that type of vivid sensory language.

<p><b>Visual imagery</b> is language that describes what we can see. Visual imagery includes color, shape, size, and pattern.</p>	
<p><b>Auditory imagery</b> is language that describes what we can hear. Auditory imagery includes pleasant sounds, noise, and also the absence of noise.</p>	
<p><b>Olfactory imagery</b> is language that describes what we can smell. Olfactory imagery includes both pleasant and unpleasant smells.</p>	
<p><b>Gustatory imagery</b> is language that describes what we can taste. Gustatory imagery can include sweetness, sourness, bitterness, tartness, saltiness, spiciness, or savoriness.</p>	
<p><b>Tactile imagery</b> is language that describes what we can feel or touch. Tactile imagery includes temperature, texture, touch, and movement.</p>
