

# Snakes

Snakes are reptiles. Snakes have long, thin bodies. They do not have any legs. Instead of walking, snakes slither across the ground. A snake's jaws can open very wide. Snakes eat things like mice and frogs, which they swallow whole. Most snakes are harmless, but some snakes have fangs filled with venom. If you see a snake, you should leave it alone!

1. Snakes are

a. mice

b. reptiles

2. What do snakes look like?

---

3. What should you do if you see a snake?
