

What Do You Know About The Carbon Cycle

Across

- 3. A third way that carbon enters the atmosphere
- 5. Some aquatic organisms use carbon to make these.
- 7. Nature's way of continually recycling carbon in the environment and in living organisms
- 8. This is about 18% carbon.
- 10. Processes which take carbon out of the atmosphere.
- 12. This bodily process puts carbon back into the atmosphere when we exhale carbon dioxide.
- 13. This takes a lot of excess carbon out of the atmosphere because carbon dioxide in the air reacts with sea water.

Down

- 1. Carbon is present in many of the different ongoing ___ that take place on Earth.
- 2. This process takes carbon out of the atmosphere.
- 4. The carbon cycle is closely tied to this cycle.
- 6. Carbon also returns to the environment by this process.
- 9. Processes that put carbon into the air.
- 10. This makes up part of all life forms on Earth.
- 11. Carbonic ___ can be created when there is too much carbon in the ocean.
