## SUBTRACT WITHIN 5

A large illustration of a rocket ship and two stars. The rocket ship is oriented diagonally, pointing towards the top right. It has a nose cone, a main body, and a tail section with two fins. The stars are positioned around the rocket. Each part of the rocket and the stars contains a simple subtraction problem. The problems are:  $4-0$  (top right),  $3-2$  (left star),  $1-0$  (top middle star),  $4-4$  (nose cone),  $3-3$  (left fin),  $5-0$  (main body),  $4-2$  (main body),  $5-2$  (bottom left circle),  $5-0$  (bottom fin),  $4-3$  (bottom fin),  $2-2$  (right fin),  $5-1$  (bottom fin),  $1-1$  (bottom fin), and  $5-3$  (bottom right circle).

0 - Red      2 - Blue      4 - Orange  
1 - Yellow    3 - Green      5 - Black

How Did You Do? 😊 😐 😞
