

International Date Line

DIRECTIONS: Study the picture of the Earth and an approximation of the International Date Line. Answer the questions.

1. If it is Monday in the United States, what day is it in Egypt?
2. If it is Saturday in Australia, what day is it in South America?
3. If you were to fly west from Louisiana to New Zealand, would you gain a day or lose a day?
4. If you were to travel east from California to New York, would you gain a day or lose a day?
