## Quora

### Answers

1. Quora was created by Adam D' Angelo and Charlie Cheever in 2009.
2. On Quora, you can ask questions about almost anything and get answers from other users who know about that topic.
3. Quora allows users to upvote or downvote answers. The answers with the most upvotes rise to the top.
4. You can use Quora to learn about things you're interested in by following topics related to those interests. When someone asks a question about a topic you follow, you'll see it on your Quora feed.
5. It's important to use Quora safely because you should always ask a parent or guardian before using the site, and you should be respectful when asking or answering questions on Quora.
