

Name _____

Ways of making numbers

Fill in the missing numbers

<p>A number bond for the number 7. The number 7 is in a central circle. Six boxes are connected to it by lines, each containing an addition equation. The equations are: $4 + 3$ (top), $1 + 6$ (top-left), $5 + 2$ (top-right), $2 + 5$ (bottom-left), $4 + 3$ (bottom-right), and $3 + 4$ (bottom).</p>	<p>A number bond for the number 8. The number 8 is in a central circle. Six boxes are connected to it by lines, each containing an addition equation. The equations are: $7 + 1$ (top), $1 + 7$ (top-left), $6 + 2$ (top-right), $2 + 6$ (bottom-left), $5 + 3$ (bottom-right), and $4 + 4$ (bottom).</p>
<p>A number bond for the number 9. The number 9 is in a central circle. Six boxes are connected to it by lines, each containing an addition equation. The equations are: $1 + 8$ (top), $3 + 6$ (top-left), $6 + 3$ (top-right), $2 + 7$ (bottom-left), $5 + 4$ (bottom-right), and $4 + 5$ (bottom).</p>	<p>A number bond for the number 10. The number 10 is in a central circle. Six boxes are connected to it by lines, each containing an addition equation. The equations are: $8 + 2$ (top), $1 + 9$ (top-left), $7 + 3$ (top-right), $3 + 7$ (bottom-left), $6 + 4$ (bottom-right), and $5 + 5$ (bottom).</p>
