# Graphing Lines

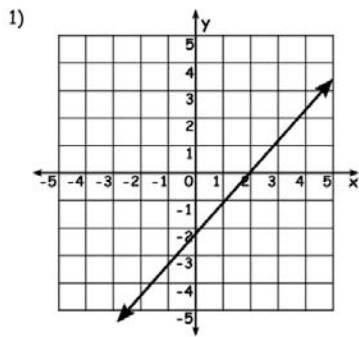

Identify the type of slope,  
positive, negative, zero or undefined.

**Positive** - If the straight line is going from left to right and upwards, the line is a rising line with the slope being positive.

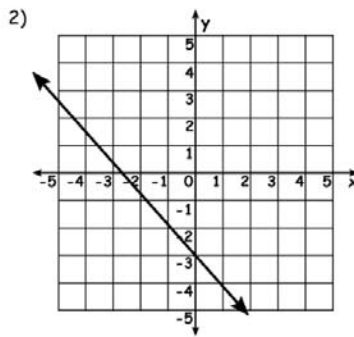

**Negative** - If the straight line is going from left to right and downwards, the line is falling line with the slope being negative.

**Zero** - If the straight line is horizontal, the slope will be zero.

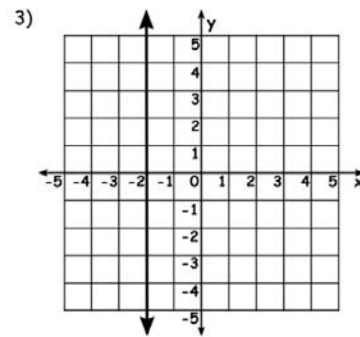

**Undefined** - If the straight line is vertical, the slope is undefined.

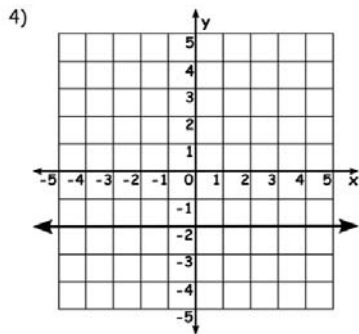

Slope = Positive

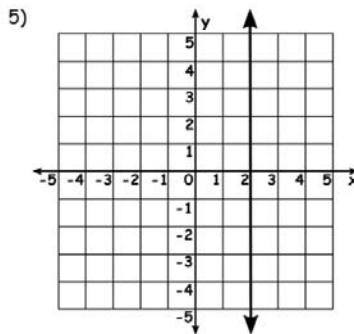

Slope = Negative

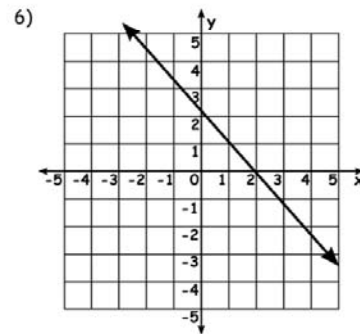

Slope = Undefined

Slope = Zero

Slope = Undefined

Slope = Negative
