

Name \_\_\_\_\_

# Coordinate graphing

Find the length of the line segment by plotting each set of ordered pairs and joining the points.

1)  $(-2, 2), (3, 2)$

length of line segment = \_\_\_\_\_

2)  $(-3, 2), (-3, -2)$

length of line segment = \_\_\_\_\_

3)  $(-3, -3), (3, -3)$

length of line segment = \_\_\_\_\_

4)  $(0, 2), (3, -2)$

length of line segment = \_\_\_\_\_
