

Name _____ **Dinosaurs**

The Speedy Dinosaur Answer Key

1. The fastest dinosaur to have ever lived was the Velociraptor.
2. Velociraptors had long, powerful legs that allowed them to take big leaps and run swiftly. Their lightweight bodies made them agile, and their sharp, curved claws helped them grip the ground while running.
3. Velociraptors could run as fast as 40 miles per hour.
4. Being fast was important for Velociraptors because it helped them escape from dangerous situations and catch their prey for food.
