Scrabble is a classic Word Game that challenges players to use their vocabulary, spelling, and strategic skills to create words and score points on game board. Each player starts with a set of letter tiles, each bearing a letter and a point value. The game board consists of a grid with special spaces that can multiply a word's score or add extra points for specific letters.

The objective of scrabble is to form words on the board, crossword-style, using your tiles while aiming to maximize your score. Words can be placed horizontally or vertaically and must connect with existing words on the board. Points are awarded based on the length and complexity of the word, as well as any premium spaces it covers. Scrabble is not only a fun and competitive game but also an excellent way to improve vocabulary and language skills. It requires players to think strategically balance risk and reward, and adapt to changing game dynamics, making it a timeless favorite for word enthusiasts of all ages.
