

Name _____

Answer Key: Indonesian Tsunami

1. A massive tsunami struck a coastal village in Indonesia.
2. The tsunami was caused by a powerful undersea earthquake in the Indian Ocean.
3. The tsunami swept away homes, boats, and trees in the village. It also damaged the coral reefs and polluted the sea.
4. The villagers, with the help of aid organizations and neighboring communities, came together to rebuild their homes and lives. They also worked to restore the coral reefs and protect their coastline.
5. Coral reefs are important because they serve as habitats for various marine life and contribute to the health of the ocean ecosystem.
