

Sustainable Living

Answer Key

1. The wind turbine generates energy at a rate of 80 kilowatt-hours per day.
2. The solar panel installation produces electricity at a rate of 50 megawatt-hours per month.
3. The electric car travels at a rate of 8 kilometers per kilowatt-hour.
4. The dam generates energy at a rate of 15,000 megawatt-hours per year.
5. The biofuel plant produces biofuel at a rate of 400 gallons per day.
6. The geothermal power plant generates energy at a rate of 2.5 megawatt-hours per day.
7. The solar panels produce electricity at a rate of 40 kilowatt-hours per day.
8. The wind farm generates energy at a rate of 100 megawatt-hours per day.
9. The solar installation produces electricity at a rate of 40 kilowatt-hours per day.
10. The electric bike travels at a rate of 30 kilometers per kilowatt-hour.
