Name _____

Ordering Fractions

Order the fractions with the same denominators in decreasing order.

Remember: When fractions have the same denominators, just compare numerator. The bigger the numerator, the bigger the fraction.

$$\frac{3}{5} > \frac{2}{5}$$

1) $\frac{9}{15}, \frac{4}{15}, \frac{3}{15}, \frac{14}{15}, \frac{7}{15}$ → $\frac{14}{15}, \frac{9}{15}, \frac{7}{15}, \frac{4}{15}, \frac{3}{15}$

2) $\frac{17}{21}, \frac{10}{21}, \frac{19}{21}, \frac{8}{21}, \frac{16}{21}$ → $\frac{19}{21}, \frac{17}{21}, \frac{16}{21}, \frac{10}{21}, \frac{8}{21}$

3) $\frac{12}{18}, \frac{15}{18}, \frac{7}{18}, \frac{3}{18}, \frac{9}{18}$ → $\frac{15}{18}, \frac{12}{18}, \frac{9}{18}, \frac{7}{18}, \frac{3}{18}$

4) $\frac{8}{25}, \frac{13}{25}, \frac{4}{25}, \frac{21}{25}, \frac{16}{25}$ → $\frac{21}{25}, \frac{16}{25}, \frac{13}{25}, \frac{8}{25}, \frac{4}{25}$

5) $\frac{7}{12}, \frac{1}{12}, \frac{4}{12}, \frac{9}{12}, \frac{6}{12}$ → $\frac{9}{12}, \frac{7}{12}, \frac{6}{12}, \frac{4}{12}, \frac{1}{12}$

6) $\frac{9}{13}, \frac{5}{13}, \frac{2}{13}, \frac{3}{13}, \frac{11}{13}$ → $\frac{11}{13}, \frac{9}{13}, \frac{5}{13}, \frac{3}{13}, \frac{2}{13}$

7) $\frac{5}{19}, \frac{16}{19}, \frac{18}{19}, \frac{14}{19}, \frac{9}{19}$ → $\frac{18}{19}, \frac{16}{19}, \frac{14}{19}, \frac{9}{19}, \frac{5}{19}$

8) $\frac{9}{21}, \frac{12}{21}, \frac{5}{21}, \frac{17}{21}, \frac{14}{21}$ → $\frac{17}{21}, \frac{14}{21}, \frac{12}{21}, \frac{9}{21}, \frac{5}{21}$
