

Name _____

Cross Multiplication

Subtract Improper fractions using cross multiplication.

1) $\frac{15}{4} - \frac{5}{3} = \square$

3) $\frac{19}{4} - \frac{4}{3} = \square$

5) $\frac{17}{7} - \frac{9}{5} = \square$

7) $\frac{21}{4} - \frac{5}{2} = \square$

9) $\frac{17}{5} - \frac{13}{10} = \square$

11) $\frac{21}{4} - \frac{11}{8} = \square$

13) $\frac{31}{10} - \frac{7}{5} = \square$

15) $\frac{35}{12} - \frac{7}{4} = \square$

2) $\frac{21}{4} - \frac{15}{9} = \square$

4) $\frac{15}{7} - \frac{9}{5} = \square$

6) $\frac{15}{4} - \frac{13}{9} = \square$

8) $\frac{14}{3} - \frac{7}{5} = \square$

10) $\frac{33}{4} - \frac{7}{3} = \square$

12) $\frac{27}{4} - \frac{15}{10} = \square$

14) $\frac{7}{3} - \frac{11}{7} = \square$

16) $\frac{21}{9} - \frac{7}{5} = \square$
