Name _____

Simplify Improper Fractions

Convert each improper fraction into mixed number and reduced to its lowest term.

1) $\frac{75}{35} = 2\frac{5}{35} = 2\frac{1}{7}$	2) $\frac{30}{21} = \square = \square$
3) $\frac{68}{24} = \square = \square$	4) $\frac{25}{10} = \square = \square$
5) $\frac{14}{12} = \square = \square$	6) $\frac{63}{30} = \square = \square$
7) $\frac{80}{25} = \square = \square$	8) $\frac{72}{40} = \square = \square$
9) $\frac{96}{30} = \square = \square$	10) $\frac{95}{35} = \square = \square$
11) $\frac{72}{28} = \square = \square$	12) $\frac{70}{25} = \square = \square$
13) $\frac{88}{40} = \square = \square$	14) $\frac{30}{21} = \square = \square$
15) $\frac{46}{20} = \square = \square$	16) $\frac{81}{36} = \square = \square$
