

Name _____

Exploring Iconic Landmarks and Monuments

Have you ever wondered about the famous landmarks and monuments that exist all around the world? These incredible structures have unique stories and histories that make them special and worth visiting. Let's take a journey to discover some of the most iconic landmarks and monuments from different parts of the globe.

The Eiffel Tower is one of the most famous landmarks in the world. It was built in 1889 as part of the World's Fair. This towering iron structure stands at 984 feet tall, which is as tall as an 81-story building! Visitors can take an elevator ride to the top for a breathtaking view of the city of Paris.

Imagine a wall so long that it stretches over 13,000 miles! The Great Wall of China was built over many centuries to protect China from invaders. It's made of stones, earth, and bricks. It's so long that it could wrap around the Earth's equator almost two times!

Lady Liberty, as she is often called, was a gift from France to the United States. She stands tall in the New York Harbor, welcoming immigrants to America. The statue is 151 feet tall and is a symbol of freedom and liberty.

The Pyramids of Giza are ancient wonders that were built more than 4,000 years ago! These pyramids were tombs for Egyptian pharaohs. The Great Pyramid is the largest and is as tall as a 40-story building. Scientists are still amazed by how the Egyptians built these massive structures without modern tools.

Hidden high in the Andes Mountains, Machu Picchu is an ancient city built by the Incas. It's perched on a steep hill and surrounded by lush greenery. The Incas built this city without using any mortar to hold the stones together, and it's considered an engineering marvel.
