

Sequential Writing

Transition words connect clauses, sentences, paragraphs, or entire sections of writing together to show how they are related. Different transition words signal different kinds of relationships. One kind of relationship that transition words can signal between ideas is sequence, or the order in which they happened. Some transition words that signal sequence are:

first, second, etc.

next

then

from time to time

in the meantime

finally

later

before

after

henceforth

during

by the time

until now

occasionally

sometimes

DIRECTIONS: Write about your morning routine. Use transition words to indicate the order in which the activities take place.
