## Angles on a Straight Line

Angles on a straight line relate to the sum of angles that can be arranged together so that they form a straight line

Work out the sizes of the unknown angles

1)

$$w = \boxed{\phantom{00}}^\circ$$

2)

$$y = \boxed{\phantom{00}}^\circ$$

3)

$$x = \boxed{\phantom{00}}^\circ$$

4)

$$z = \boxed{\phantom{00}}^\circ$$

5)

$$k = \boxed{\phantom{00}}^\circ$$

6)

$$g = \boxed{\phantom{00}}^\circ$$
