## Line, Rays and Line Segments

A line is a straight path on a plane that extends forever in both directions with no endpoints. A line segment is part of a line that has two endpoints and is finite in length. A ray is a line segment that extends indefinitely in one direction.

Draw line, rays and line segments

1	Line Segment LM
2	Line JK
3	Ray EF
4	Line Segment VW
5	Line VW
6	Ray JK
7	Line Segment JK
8	Line EF
9	Ray XY
10	Line Segment EF
