## Division by repeated Subtraction

Solve the following division problems using repeated subtraction.  
Then, verify your answer by using multiplication.

1)  $63 \div 7 \rightarrow$   $63 - 7 - 7 - 7 - 7 - 7 - 7 - 7 - 7 - 7 = 0$

Quotient : 9      Verify :  $7 \times 9 = 63$

2)  $28 \div 4 \rightarrow$   $28 - 4 - 4 - 4 - 4 - 4 - 4 - 4 = 0$

Quotient : 7      Verify :  $4 \times 7 = 28$

3)  $35 \div 5 \rightarrow$   $35 - 5 - 5 - 5 - 5 - 5 - 5 - 5 = 0$

Quotient : 7      Verify :  $5 \times 7 = 35$

4)  $40 \div 8 \rightarrow$   $40 - 8 - 8 - 8 - 8 - 8 = 0$

Quotient : 5      Verify :  $5 \times 8 = 40$

5)  $72 \div 9 \rightarrow$   $72 - 9 - 9 - 9 - 9 - 9 - 9 - 9 - 9 = 0$

Quotient : 8      Verify :  $9 \times 8 = 72$

6)  $24 \div 4 \rightarrow$   $24 - 4 - 4 - 4 - 4 - 4 - 4 = 0$

Quotient : 6      Verify :  $4 \times 6 = 24$

7)  $36 \div 6 \rightarrow$   $36 - 6 - 6 - 6 - 6 - 6 - 6 = 0$

Quotient : 6      Verify :  $6 \times 6 = 36$

8)  $45 \div 5 \rightarrow$   $45 - 5 - 5 - 5 - 5 - 5 - 5 - 5 - 5 = 0$

Quotient : 9      Verify :  $5 \times 9 = 45$
