

Name _____

Rounding to the underlined digit

Round each number to the underlined place value and find the difference.

- 1) $\underline{9}85 - 3\underline{2}5 = \underline{1000 - 330 = 980}$
- 2) $1\underline{2}58 - 4\underline{9}2 = \underline{1300 - 490 = 810}$
- 3) $34\underline{5}2 - \underline{1}242 = \underline{3450 - 1000 = 2450}$
- 4) $52\underline{5}8 - 5\underline{4}2 = \underline{5260 - 540 = 4720}$
- 5) $67\underline{8}2 - 3\underline{2}45 = \underline{6780 - 3200 = 3580}$
- 6) $9\underline{6}58 - 4\underline{9}6 = \underline{9700 - 500 = 9200}$
- 7) $\underline{3}587 - \underline{1}54 = \underline{4000 - 150 = 3850}$
- 8) $9\underline{2}55 - 33\underline{5}8 = \underline{9300 - 3360 = 5940}$
- 9) $1\underline{2}485 - \underline{2}487 = \underline{12000 - 2000 = 10000}$
- 10) $254\underline{5}3 - \underline{5}254 = \underline{25500 - 5000 = 20500}$
- 11) $12\underline{5}48 - 3\underline{8}7 = \underline{12500 - 390 = 12110}$
- 12) $34\underline{5}83 - 3\underline{6}95 = \underline{35000 - 3700 = 31300}$
- 13) $24\underline{8}72 - 19\underline{6}2 = \underline{25000 - 1960 = 23040}$
- 14) $32\underline{2}48 - 5\underline{7}58 = \underline{32200 - 5800 = 26400}$
- 15) $24\underline{7}82 - 6\underline{8}73 = \underline{24800 - 6900 = 17900}$
