## Consecutive Numbers

Write the next two consecutive numbers for each given number and find their sum.

$$1) 5, \underline{6}, \underline{7} = \underline{5 + 6 + 7 = 18}$$

$$2) 10, \underline{11}, \underline{12} = \underline{10 + 11 + 12 = 33}$$

$$3) 12, \underline{13}, \underline{14} = \underline{12 + 13 + 14 = 39}$$

$$4) 8, \underline{9}, \underline{10} = \underline{8 + 9 + 10 = 27}$$

$$5) 15, \underline{16}, \underline{17} = \underline{15 + 16 + 17 = 48}$$

$$6) 20, \underline{21}, \underline{22} = \underline{20 + 21 + 22 = 63}$$

$$7) 16, \underline{17}, \underline{18} = \underline{16 + 17 + 18 = 51}$$

$$8) 25, \underline{26}, \underline{27} = \underline{25 + 26 + 27 = 78}$$

$$9) 18, \underline{19}, \underline{20} = \underline{18 + 19 + 20 = 57}$$

$$10) 30, \underline{31}, \underline{32} = \underline{30 + 31 + 32 = 93}$$
