

Name _____

2-Step Order of Operations

Solve the following problems by performing the exponent operation first, then multiplication.

1) $3 \times 2^2 = \underline{12}$

2) $3^2 \times 4 = \underline{36}$

3) $4^2 \times 2 = \underline{32}$

4) $5 \times 2^3 = \underline{40}$

5) $5^2 \times 3 = \underline{75}$

6) $4 \times 3^3 = \underline{108}$

7) $2^4 \times 6 = \underline{96}$

8) $4^2 \times 5 = \underline{80}$

9) $3^4 \times 2 = \underline{162}$

10) $5^2 \times 4 = \underline{100}$

11) $3 \times 6^2 = \underline{108}$

12) $4 \times 2^5 = \underline{128}$

13) $6 \times 3^3 = \underline{162}$

14) $5 \times 4^3 = \underline{320}$

15) $5^3 \times 2 = \underline{250}$

16) $2^4 \times 3 = \underline{48}$

17) $2 \times 6^2 = \underline{72}$

18) $3 \times 4^3 = \underline{192}$

19) $5 \times 3^4 = \underline{405}$

20) $2^3 \times 7 = \underline{56}$
