

Name _____

2-Step Order of Operations

Solve the following problems by performing the exponent operation first, then subtraction.

1) $9 - 2^2 = \underline{5}$

2) $5^2 - 15 = \underline{10}$

3) $4^2 - 2 = \underline{14}$

4) $30 - 2^3 = \underline{22}$

5) $5^2 - 25 = \underline{0}$

6) $50 - 3^3 = \underline{23}$

7) $2^4 - 4 = \underline{12}$

8) $4^2 - 5 = \underline{11}$

9) $3^4 - 10 = \underline{71}$

10) $5^3 - 60 = \underline{65}$

11) $90 - 6^2 = \underline{54}$

12) $80 - 2^5 = \underline{48}$

13) $45 - 3^3 = \underline{18}$

14) $70 - 4^3 = \underline{6}$

15) $5^3 - 55 = \underline{70}$

16) $2^4 - 10 = \underline{6}$

17) $75 - 6^2 = \underline{39}$

18) $65 - 4^3 = \underline{1}$

19) $150 - 3^4 = \underline{69}$

20) $2^5 - 28 = \underline{4}$
