

Name _____

2-step order of operations

Solve the multiplication first, then subtract the result from the initial number.

1) $20 - 4 \times 3 = \underline{8}$

2) $18 - 5 \times 2 = \underline{8}$

3) $30 - 6 \times 4 = \underline{6}$

4) $50 - 7 \times 5 = \underline{15}$

5) $25 - 3 \times 6 = \underline{7}$

6) $40 - 4 \times 7 = \underline{12}$

7) $27 - 9 \times 2 = \underline{9}$

8) $35 - 5 \times 4 = \underline{15}$

9) $45 - 3 \times 9 = \underline{18}$

10) $32 - 8 \times 2 = \underline{16}$

11) $28 - 7 \times 3 = \underline{7}$

12) $55 - 10 \times 4 = \underline{15}$

13) $60 - 5 \times 6 = \underline{30}$

14) $22 - 2 \times 9 = \underline{4}$

15) $48 - 6 \times 6 = \underline{12}$

16) $66 - 11 \times 5 = \underline{11}$

17) $36 - 6 \times 5 = \underline{6}$

18) $24 - 4 \times 4 = \underline{8}$

19) $80 - 10 \times 7 = \underline{10}$

20) $33 - 3 \times 6 = \underline{15}$
