

Name :

Class :

Perimeter of Squares and Rectangles

Perimeter of square (P)
 $= 4 \times \text{Side} = 4 \times a$

The formula for the perimeter of squares is $P = 4 \times \text{side}$. and The formula for the perimeter of rectangle $p = 2(L + W)$.

Perimeter of a Rectangle

Formula:

$$P = 2L + 2W$$

Find the perimeter of each square and rectangle.

1)

$$P = 36\text{ft}$$

2)

$$P = 44\text{ft}$$

3)

$$P = 60\text{ft}$$

4)

$$P = 22\text{ft}$$

5)

$$P = 40\text{ft}$$

6)

$$P = 20.0\text{ft}$$
