

NAME: _____

AREA OF PARALLELOGRAM

Instructions Read each problem carefully. Solve and complete each box with the correct answer

1. Calculate the area of a parallelogram, knowing that the sum of the base and the height is 40 cm and that the height is 10 cm.

$$a=? \quad b? \quad * \quad h$$
$$\boxed{} = \boxed{} * \boxed{}$$

2. The height of a parallelogram is 8 cm. Knowing that its area is 72 cm². What is the base of the parallelogram?

$$a= \quad b? \quad * \quad h$$
$$\boxed{} = \boxed{} * \boxed{}$$

3. The area of a parallelogram is 450 cm². Taking into account that the base is double the height which is 15 cm, calculate the base of the parallelogram.

$$a= \quad b? \quad * \quad h$$
$$\boxed{} = \boxed{} * \boxed{}$$
