

The Cafeteria Challenge

The Situation - The school cafeteria can add **ONE** new weekly menu item. Students have submitted two proposals, but the cafeteria manager can only choose one. Read both arguments and answer the questions.

Argument A: Pizza Fridays - Pizza Fridays would give students something exciting to look forward to at the end of each week. Pizza is one of the most popular foods among students, and many students already choose pizza when it is offered. Pizza can also be made with different toppings, allowing students to choose options they enjoy.

Argument B: Taco Tuesdays - Taco Tuesdays would provide students with more variety in the cafeteria menu. Tacos can include different ingredients such as chicken, beef, beans, vegetables, and cheese. Students can customize their meals, and tacos may encourage students to try new foods while still enjoying a familiar favorite.
